The Benefits of Tate Access Floors

Tate's access floor panels and high-end architectural finishes provide the complete flooring solution you've been looking for; a beautiful and flexible workspace that captures your project's aesthetic vision while maintaining the accessibility, flexibility, and reconfigurability traditionally associated with access floor systems.

Our collection of finish options continues to grow and evolve, keeping pace with the latest interior design trends, and giving architects and designers the freedom they need to create the look their clients want. Tate access floor panels and finishes arrive at your job site installation-ready, which can reduce initial costs and accelerate construction schedules.

Tate's in-house engineering team is constantly working to develop new and exciting ways to customize your building's look even further, including custom panel inlays, sandblasting, and hybrid panel capabilities featuring same-panel curved transitions.

Whatever look you're trying to achieve, Tate can make it a reality.

The continuous evolution of access flooring systems means today's high-performance buildings can maintain accessibility to the underfloor pathway housing power, data, voice, and air services while still

having a wide selection of high-end architectural finishes. With each modular panel capable of being easily removed anywhere along the service path, access floors give you total control over your building's service distribution systems.

Flexibility

Today's business landscape is all about being agile, and your workspace needs to maintain the same flexibility your business does in order to stay competitive — maximizing both individual comfort and worker efficiency while minimizing costs. The modular design of

Tate's access floor systems allows you to easily relocate service terminals and air diffusers within minutes or rotate panels out of high-traffic areas to minimize wear. Simply swap the panels and get back to your business.

Reconfigurable

A step beyond flexibility, Tate's access floors help ensure that your business is future proof, allowing you to completely reconfigure your workspace as your business grows and changes. Tate access floors make it simple to replace one finish with another or add/

remove partition walls – allowing your building's aesthetic to adapt to your needs both today <u>and</u> in the future.

High-End Architectural Finishes for Access Floors

Strength

With multiple panel grades available to accommodate varying load needs in different areas

as a wide variety of seismic and heavy-duty understructure options, Tate access floor panel are able to handle any job regardless of the load requirements.

Time Tate access floors panels and high-end architectural finishes arrive at your work site as a finished product which is installation-ready.

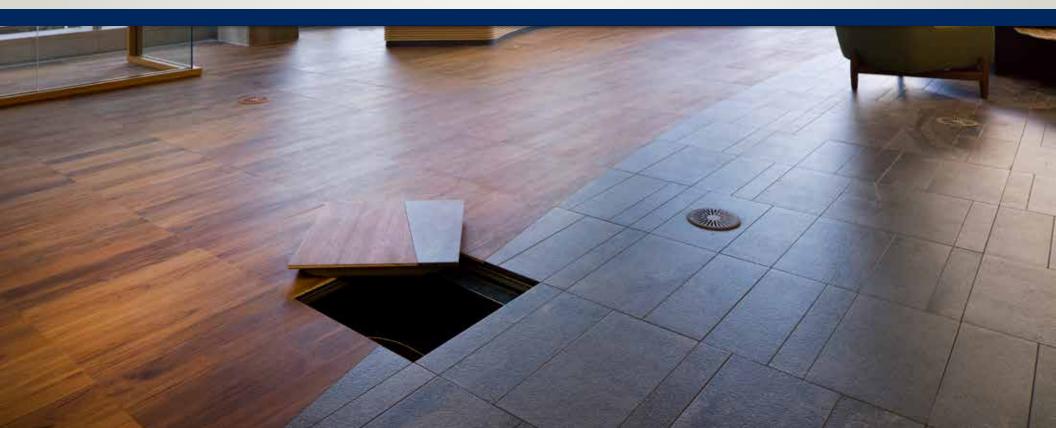

This means a quicker, more efficient installation process and an earlier move-in date for your project.

Cost Savings

Time is money, which is why Tate access floors are the smart choice for any project. Design assisted solutions arriving

installation-ready from the factory means fewer on-site trades and less time spent during construction overall. That's money that goes straight to your bottom line.

STONEWORKSTM

Sleek. Stylish. Durable.

The latest innovation for the built environment is here. Tate's STONEWORKS line of raised access floor panels utilize our industry recognized engineering and manufacturing expertise to combine stunning aesthetics and structural integrity into one complete integrated product. Whether you choose the increasingly popular utility of Classic and Decorative Concrete, the classic beauty of Terrazzo, or want to emulate the timeless luxury of Granite and rustic appeal of Slate, STONEWORKS will capture the essence of natural stone for your next project.

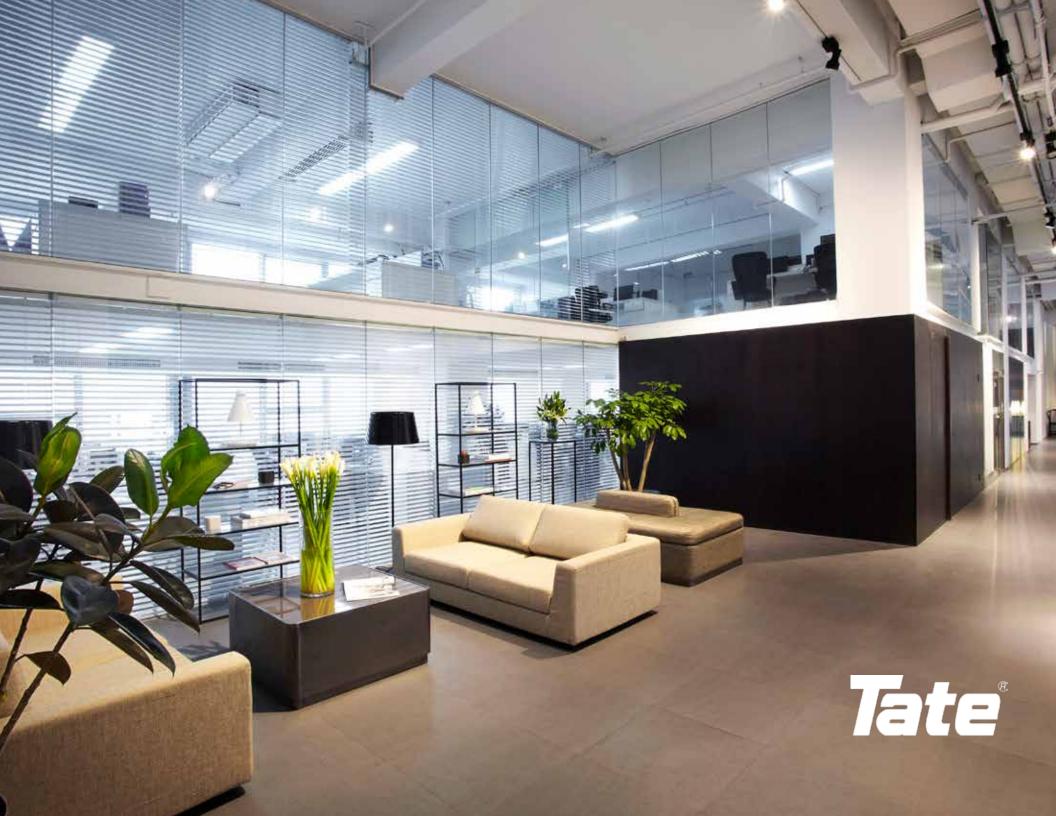

Natural Variation

Natural stone panels fall into one of 3 categories:

Display the stunning variation of natural stone

Tate's STONEWORKS panels are natural stone products, and all natural stone products contain some degree of variation, which enhances the natural look of the finish. This variation comes from differences in color or aggregate distribution.

STONEWORKS™: Classic Concrete

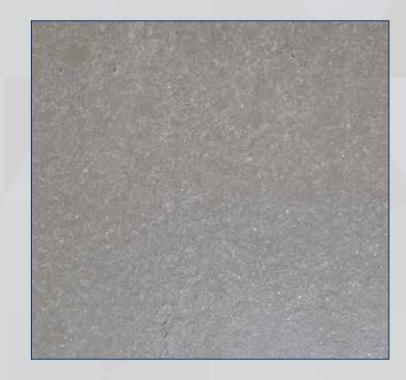

STONEWORKS Classic Concrete panels offer the ultimate combination of appearance and functionality. Classic Concrete panels come with a brushed surface texture and gives your project a durable, low-maintenance floor, featuring one of today's fasting growing design trends.

Color Classic Concrete is available in gray.

For CSI Specifications, Data Sheets, and Technical Drawings visit our website at <u>www.tateinc.com/commercial</u>.

STONEWORKS™: Decorative Concrete

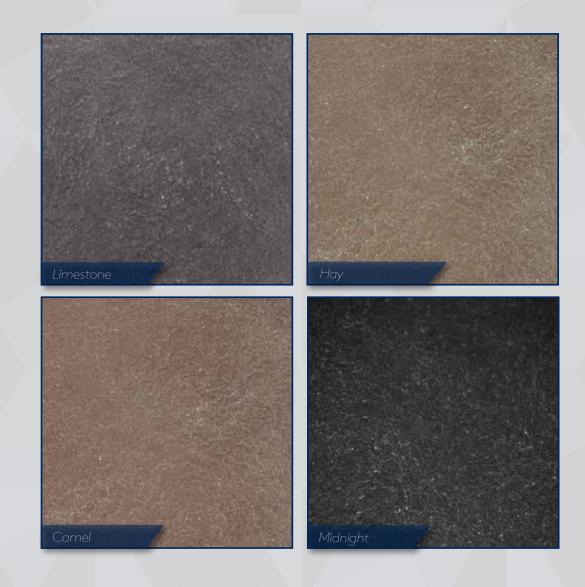

STONEWORKS Decorative Concrete panels will transform your space with style, durability, and functionality. Style and color abound - Decorative Concrete panels come with a brushed surface texture, and are available in four standard colors to suit your particular design aesthetic.

Colors

STONEWORKS™: Terrazzo

STONEWORKS Terrazzo is a classically beautiful and timeless finish option. Cementitious Terrazzo is easy to clean, and requires little maintenance. It's the perfect option for your building's high-traffic areas, and is available with a beautiful honed surface finish.

Colors

Tate also partners with Nurazzo to offer an expanded range of laminated terrazzo with natural or recycled marble, and glass aggregates. Learn more at <u>www.tateinc.com/commercial</u>.

Porcelain

With an alluring combination of aesthetics and flexibility, and a wide variety of styles and colors to choose from, porcelain enhances the architectural form and space of any building. Customize your building's look even further by choosing between one-piece or multi-piece design options.

Designs

Wood

Capture the beauty and variation of natural wood. Tate's wood finishes offer a long-lasting and versatile finish guaranteed to enhance the look of your building. Choose between stacked and plank designs each of which is available in a wide variety of species.

Design and Technical Assistance

The Resources You Need

Tatelnc.com is your one-stop resource center for access floor information and documentation. We strive to keep information up-to-date so you have access to the most recent resources available.

- Product Data Sheet
- Product Details
- Product Specifications
- Architectural Details
- Cost Models
- Design Guides
- BIM Models

Tate offers application engineering, as well as design and specification assistance, to help develop the solution you need for your project.

Our world-class manufacturing facilities, and extensive network of experienced dealers and vendors, means we have the resources to create the custom modular solution you need, and Tate's in-house engineering team has the experience and industry knowledge to help design solutions that meet the specific requirements of your project.

In addition, Tate's world class customer and technical service teams are there to help every step of the way from concept to completion. Whatever you need, Tate is your single source solution.
